I. CLAIM AMENDMENTS

1. (Currently amended) An apparatus comprising:

a telephone having a computer readable storage readable medium and an input device connected to a processor;
a first program and a second program in the a-computer readable storage readable medium;
wherein the first program comprises instructions for the processor to perform steps comprising:
responsive to a plurality of user actions at the input device, defining a plurality of policieswherein;
wherein the storage medium- second program comprises instructions for a the processor to perform steps comprising:
detecting an incoming telephone call received by a the telephone;
determining a plurality of conditions associated with the telephone;
comparing the plurality of conditions to a plurality of policies, each policy comprising a plurality of condition criteria and a telephone behavior instruction;
identifying a single policy within the policies, the single policy containing the condition criteria corresponding to the conditions;
adjusting a telephone behavior according to the telephone behavior instruction for the single policy wherein the telephone behavior is an action that the telephone takes in response to the reception of the incoming telephone call;
wherein the action comprises a plurality of telephone behaviors; and

Serial No. 10/790,968
Attorney Docket No. RSW92004009US1
Response to Office Action mailed 7/10/2007

wherein the action is accomplished without a mode change control unit, a mode selection button, or a separation of an ambient sound into a speech component and a non-speech component;
and wherein the telephone is a wireless telephone.

2. (Previously amended) The apparatus of claim 1 wherein the policies further comprise:
a policy priority number; and
wherein the policy priority number resolves any outcome conflicts between the policies.
3. (Previously amended) The apparatus of claim 1 wherein the policies are stored in a policy table according to the policy priority number.
4. (Currently amended) The apparatus of claim 1 further comprising: the telephone; and
wherein the computer readable storage medium is a memory within the telephone.
5. Canceled. (Previously amended) The apparatus of claim 1 wherein the steps further comprise: allowing a user to define the policies using a policy creation program.
6. (Previously amended) The apparatus of claim 1 wherein one of the condition criteria is a location criterion; and wherein the location of the telephone is determined using a GPS network.
7. (Original) The apparatus of claim 6 wherein one of the condition criteria is a location criterion; and wherein the location of the telephone is determined using triangulation.
8. (Original) The apparatus of claim 6 wherein one of the condition criteria is a context criterion; and wherein the context is determined by accessing a PDA program stored on the telephone.

Serial No. 10/790,968
Attorney Docket No. RSW92004009US1
Response to Office Action mailed 7/10/2007

9. (Original) The apparatus of claim 6 wherin one of the condition criteria is a caller criterion; and wherein the caller identity is determined by analyzing the caller ID data associated with the incoming telephone call.
10. (Original) The apparatus of claim 6 wherein one of the condition criteria is a caller criterion; and wherein the caller identity is determined by analyzing the caller ID data associated with the incoming telephone call and accessing a PDA program stored on the telephone.
11. (Original) The apparatus of claim 6 wherein the condition criteria comprise a location criterion and a context criterion.
12. (Original) The apparatus of claim 6 wherein the condition criteria comprise a location criterion and a caller criterion.
13. (Original) The apparatus of claim 6 wherein the condition criteria comprise a context criterion and a caller criterion.
14. (Original) The apparatus of claim 6 wherein the condition criteria comprise a location criterion, a context criterion, and a caller criterion.
15. (Currently amended) An method comprising:
using a telephone having a computer readable storage medium and an input device connected to a processor, installing a policy creation program and a telephone behavior control program on a the computer readable storage medium;
wherein the policy creation program comprises instructions for the processor to perform steps comprising:
responsive to a plurality of user actions at the input device, defining a plurality of policies;

Serial No. 10/790,968
Attorney Docket No. RSW92004009US1
Response to Office Action mailed 7/10/2007

wherein the telephone behavior control program storage medium comprises instructions for a processor to perform steps comprising:

detecting an incoming telephone call received by a telephone;

determining a plurality of plurality of conditions associated with a telephone;

comparing the conditions to the plurality of policies, each policy comprising a plurality of condition criteria and a telephone behavior instruction;

identifying a single policy within the plurality of policies, the single policy containing the condition criteria corresponding to the conditions;

adjusting a telephone behavior according to the telephone behavior instruction for the single policy wherein the telephone behavior is an action that the telephone takes in response to the reception of an incoming telephone call; and

wherein the action comprises a plurality of telephone behaviors;

wherein the action is accomplished without a mode change control unit, a mode selection button, or a separation of an ambient sound into a speech component and a non-speech component;

wherein the telephone is a wireless telephone.

16. (Original) The method of claim 15, wherein the policies further comprise:

a policy priority number; and

wherein the policy priority number resolves any outcome conflicts between the policies.

17. (Original) The method of claim 15 wherein the policies further comprise:

a policy priority number; and

wherein the policies are stored in a policy table according to the policy priority number.

Serial No. 10/790,968
Attorney Docket No. RSW92004009US1
Response to Office Action mailed 7/10/2007

18. (Original) The method of claim 15 wherein the computer usable medium is a memory within the telephone.
19. Canceled. (Original) The method of claim 15 wherein the steps further comprise: allowing a user to define the policies using a policy creation program.
20. (Original) The method of claim 15 wherein one of the condition criteria is a location criterion; and wherein the location of the telephone is determined using a GPS network.
21. (Original) The method of claim 15 wherein one of the condition criteria is a location criterion; and wherein the location of the telephone is determined using triangulation.
22. (Original) The method of claim 15 wherein one of the condition criteria is a context criterion; and wherein the context is determined by accessing a PDA program stored on the telephone.
23. (Original) The method of claim 15 wherein one of the condition criteria is a caller criterion; and wherein the caller identity is determined by analyzing the caller ID data associated with the incoming telephone call.
24. (Original) The method of claim 15 wherein one of the condition criteria is a caller criterion; and wherein the caller identity is determined by analyzing the caller ID data associated with the incoming telephone call and accessing a PDA program stored on the telephone.
25. (Original) The method of claim 15 wherein the condition criteria comprise a location criterion and a context criterion.
26. (Original) The method of claim 15 wherein the condition criteria comprise a location criterion and a caller criterion.
27. (Original) The method of claim 15 wherein the condition criteria comprise a context criterion and a caller criterion.

Serial No. 10/790,968
Attorney Docket No. RSW92004009US1
Response to Office Action mailed 7/10/2007

28. (Original) The method of claim 15 wherein the condition criteria comprise a location criterion, a context criterion, and a caller criterion.

29. (Currently amended) An apparatus comprising:

a telephone having a computer readable storage medium and an input device connected to a processor;

responsive to a plurality of user actions at the input device, defining a plurality of policies;

means for detecting an incoming telephone call received by ~~a~~ the telephone;
means for determining a plurality of conditions associated with the telephone;
means for comparing the plurality of conditions to a plurality of policies, each policy comprising a plurality of condition criteria and a telephone behavior instruction;

means for identifying a single policy within the policies, the single policy containing the condition criteria corresponding to the conditions;

means for adjusting a telephone behavior wherein the telephone behavior is an action that the telephone takes in response to the reception of the incoming telephone call according to the telephone behavior instruction for the single policy;

wherein the policy priority number resolves any outcome conflicts between the policies;

wherein the plurality of policies are stored in a policy table according to the policy priority number;

means for allowing a user to define the policies using a policy creation program;
wherein the computer readable storage medium is a memory within the telephone;

Serial No. 10/790,968
Attorney Docket No. RSW92004009US1
Response to Office Action mailed 7/10/2007

wherein the action comprises a plurality of telephone behaviors; and
wherein the action is accomplished without a mode change control unit, a mode selection button, or a separation of an ambient sound into a speech component and a non-speech component; and

wherein the telephone is a wireless telephone.

30. (Original) The apparatus of claim 29 wherein the location of the telephone is determined using a GPS network.
31. (Original) The apparatus of claim 29 wherein the location of the telephone is determined using triangulation.
32. (Original) The apparatus of claim 29 wherein the context is determined by accessing a PDA program stored on the telephone.
33. (Original) The apparatus of claim 29 wherein the caller identity is determined by analyzing the caller ID data associated with the incoming telephone call.
34. (Original) The apparatus of claim 29 wherein the caller identity is determined by analyzing the caller ID data associated with the incoming telephone call and accessing a PDA program stored on the telephone.
